

INGENIOUS PROBIOTICS

# HORSE STABLE STABILISER GRANULES

## Lucaa<sup>+</sup> EQUINE PROBIOTIC CARE & HYGIENE

### Maintains Results of LUCAA+ Stable Cleaner Between Cleans

LUCAA+ Horse Stable Stabiliser Granules are for use in combination with LUCAA+ Stable Cleaner. They keep stables, horse boxes and feeding troughs cleaner and more hygienic in between routine cleaning.

The granules are enriched with beneficial 'good' probiotic bacteria, naturally sourced from plants. The helpful probiotics actively restore natural ecological balance (the microbiome) and create a healthier environment. They inhibit pathogenic bacteria that cause infections and reduce the bio-allergens - including pollen and mite faeces - that cause allergic reactions.

LUCAA+ Horse Stable Stabiliser Granules are in a solid, concentrated form for easy use. The addition of fine silver sand enriches the area with beneficial minerals and helps prevent potentially harmful wet floors. All ingredients are vegan, sustainable and quickly biodegradable.

### Protects from Respiratory Illness Caused by Ammonia

The probiotics actively remove the root causes of unpleasant odours rather than just mask the smell. This reduces the horse's exposure to ammonia odour, which reduces the risk of respiratory diseases.

### INSTRUCTIONS

Remove manure and excess contamination before treatment. Sprinkle approx. 10 grams per m<sup>2</sup> LUCAA+ Horse Stable Stabiliser on the stable floor every three three days. Maintaining good stable hygiene and ventilation is essential to prevent diseases and fly infestation. It is best to clean the stables once a week. Ensure soil is dry and clean to avoid hoof problems.

For best results, use LUCAA+ Stables Stabiliser Granules routinely as a system with LUCAA+ Stables Cleaner and LUCAA+ Waterworks Cleaner.

### RECOMMENDATIONS

- Do not use with products that may change effectiveness.
- Avoid contact with eyes & nose.
- Store in a dry place 10°C - 35°C.
- Keep out of the reach of children.

### COMPOSITION

- Silver Sand
- Plant-Based Probiotic Bacteria (Auto-Active Microorganisms)
