

INGENIOUS PROBIOTICS

LIVESTOCK WATER SUPPLY CLEANER

anna+ LIVESTOCK PROBIOTIC CARE & HYGIENE

Ensures Cleaner, Healthier Drinking Water

ANNA+ Waterworks Cleaner cleans inside drinking water pipes to ensure a high quality, uncontaminated water supply for cattle, pigs, sheep and poultry. It is enriched with beneficial probiotic 'good' bacteria, naturally sourced from plants.

These helpful probiotics actively clean potentially harmful biofilm as well as organic waste. Biofilm is the slimy layer of opportunistic pathogenic bacteria that easily develops on surfaces in contact with water. It reduces water quality and can cause an unpleasant odour. Biofilms are also often resistant to common cleaning and disinfection agents.

Removes Microbial Build Up and Biofilm

Clean drinking water, free from biofilm, pathogens and chemical pollution, improves animal health and immunity, especially in young and new born.

INSTRUCTIONS

ANNA+ Waterworks Cleaner cleans the water supply pipes by flushing, a process that requires expertise and technical knowledge (plumber). Contact the distributor if necessary. Do not use taps during this operation.

Disconnect water supply at the incoming mains and allow the pipe to run empty. Connect a booster pump to the main line. Add 1 litre LUCAA+ Waterworks Cleaner to 10 litres of lukewarm water and use to fill the pipes. Purge pipes to remove any air. Allow to stand for twelve hours. Disconnect the pipes and drain empty. Flush with hot water to remove all contamination. Re-connect to the mains, fill and rinse again.

We recommend regular chemical and/or bacterial analysis of the water to ensure optimum results. Contact us for further information.

RECOMMENDATIONS

- Do not use with products that may change effectiveness.
- Do not swallow.
- Avoid contact with eyes & nose.
- Store in a dry place 10°C - 35°C.
- Keep out of the reach of children.

COMPOSITION

- Water
- Plant-based probiotic bacteria (auto-active microorganisms)
- Surfactants
- pH stabiliser

ASK ABOUT THE RANGE!

Can - 5 Litres

- ✓ Cleaner, safer drinking water
- ✓ Reduces biofilm & iron overload
- ✓ Chemical-free, no toxins or pollutants
