

TERRAA+ WATER PURIFIER - CUSTOMER REVIEW

FANTASTIC RESULTS WITH PROVILAN TERRAA+ PROBIOTIC WATER PURIFIER

Not strictly discus related, but to cut a long story short, I lost around 40 Japanese koi from January til June. I tried everything PP, Chloramine T, acriflavin, FMG. Scrapes all came back clear water parameters were all within range bar a little bit of chlorine. I eventually went to the vets and they gave me baytril for them. This didn't help either.

Sarah recommended trying the **TERRAA+ Probiotic Water Purifier** product. (to be honest I didn't say to her that I was sceptical but I was a little after using all the other products and antibiotics with no success).

Well, it worked koi are looking healthier and no losses touch wood. Wounds all healed too. I've attached pictures of the pond now (pictures form videos) but also some very scary pictures of what the koi were like when they died, before using the product.

THANK YOU Sarah Noke.

Thanks to Aquarium Shane and Sarah Noke at Lancashire Discus Sales for sharing.
